### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a bioemulsifier, classified in class 514, subclass 8.
- II. Claims 7-19, drawn to a process for producing a bioemulsifier from *Acinetobacter*, classified in class 435, subclass 170.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Group II and Group I are related, respectively, as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, a bioemulsifier can be made synthetically that is 50.5% protein, 43% polysaccharide and 3.8% lipid. This synthetic composition need not contain protein, polysaccharide and lipid components obtained by growing *Acinetobacter*. Thus, the inventions of Groups I and II are distinct, as they are directed to separate and different inventions.

Because these inventions are distinct for the reasons give above and have acquired a separate status in the art as shown by their separate classifications, restriction for examination purposes as indicated is proper. Furthermore, the search required for one group is not required for another group, and searching the different groups would create an undue burden of search and examination. Because these inventions are separate and distinct for the reasons given above, restriction for

examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rosanne Kosson whose telephone number is 571-272-2923. The examiner can normally be reached on Monday-Friday, 8:30-6:00, with alternate Mondays off.
